0) zip old folder
zip -r ria-nodejs-v6.zip ria-nodejs
mv *.zip ria-nodejs_backups/
cd ria-nodejs
rm -rf regulatory-impact-analysis

- 1) Make a directory in the server
- 2) Within the directory get code from gitlab
git clone <https://gitlab.gtnet.gr/mariosvenet/regulatory-impact-analysis.git>
- 3) Login to Portainer
- 4) Stop and remove the **ria_govgr_dev_new** container
- 5) Create a new container by running the docker build command once in the directory that contains the Dockerfile

sudo docker build -t govgr_ria:latest .

- 6) Run/start this container in the background (refresh portainer to see that it appears running)

sudo docker run -d --publish 6000:3000 --name ria_govgr_dev_new govgr_ria:latest
